Company Person

Linz, 01.01.2022

To Whom It May Concern,

my name is Martin Hellwagner, and I'm an experienced Full Stack Web Developer as well as DevOps Engineer hailing from Linz. I'd like to take this opportunity to introduce myself and argue why I believe I'm a great addition to the Marketing team at Dynatrace.

Since my childhood, I was fascinated by computers, the Internet and the sheer endless opportunities in the realm of these technologies. That's why it may come as no surprise that following my high school graduation, I enrolled in the Bachelor's degree in Computer Science at the Johannes Kepler University (JKU) in Linz. After passing these studies with distinction in 2013, I moved to Berlin to enroll in a Master's degree in Audio Communication and Technology at the Technical University (TU), which I completed with honors in 2016.

Thereafter, I started my first full-time employment in a startup focusing on Music Technology. That's where I got in contact with my first Hyperscaler (Google Cloud Platform), with me being in charge of monitoring, scaling as well as improving the hosting infrastructure of both the company's Web and App components. Subsequently, I embarked on two very interesting and enriching excursions into iOS App Development (both with React Native and with Swift) before moving back to Linz in 2017. That's when I joined my current company Fredmansky, where I'm in charge of our DevOps infrastructure which focuses on the LEMP stack (Linux, NGINX, MySQL, PHP) hosted on Virtual Serves and managed by the Hetzner Cloud Console with considerable use of AWS S3. In addition to handling all things DevOps at Fredmansky, I was able to gain invaluable knowledge and insights into all aspects of Full Stack Development with a myriad of different projects for various clients, including (but not limited to) the relaunch of dynatrace.com in 2018.

Given my extensive and year-long knowledge in Full Stack Development and DevOps, I think I'm a great fit for the Dynatrace Marketing team. What's more, I've already had the opportunity and pleasure to work together with quite a few members of the Marketing team as part of the cooperation between Dynatrace and Fredmansky, and I'd thus be delighted to join the team full-time and showcase my abilities on a daily basis. I'm very much looking forward to hearing from you!

Yours truly,
Martin Hellwagner
